## About This Game

The Director's Cut version combines the Shadowrun Chronicles: Boston Lockdown and the INFECTED! campaigns into one game, so you don't need any other product to play.

Arriving in Boston to get away from some heat back home, you accidentally become witness to an event that will change your and every Boston citizen's life forever: A crazed dragon emerges from an underground lab spreading a trail of iridescent particles and attacks the NeoNet towers - with you inside - then crashes into Fenway Park, killing thousands. And this is only the beginning! Entrapped in a city plagued by a deadly virus, assaulted by the minions of a megacorporation, attacked by the infected and with a dragon on a rampage through the city, you will have to unearth the secret conspiracy that connects it all.

The following INFECTED! campaign puts you in a race against the clock, to save yourself from the nanite-induced disease that struck Boston. Finding out that you have gotten infected yourself during one of your fights against the headcases, you struggle desperately to find a cure for the Cognitive Fragmentation Disorder you are now suffering from, while the AI that has infected you tries to assert control over your body and mind.

Good. Very good music. Good music + good game = Amazing. This game does obviously have a ton of bugs but that's expected because it is early access, but looking past that the game is fairly easy to understand and is a very fun card game.. My computer was strained trying to run these amazing graphics. However, from what little I could play, I recommend this game to those who can run it.. Some times I think "am I real ?", what is being a conscient being on the planet ?, are animals conscient or just automata ?, I feel that creativity is the answer to those questions. Being creative is creating something utilizing elements from the world around you and mixing everything with imaginary thoughts like a painting of a tree, yes you are reproducing an existing image but you are adding to it using your own elements and design, it has been proved that animals like birds, mammals, etc are capable of such ability so are they conscient ?

This game is not going to answer this question but ♥♥♥♥ its fun and makes my brain happy

. Join the Royal Air Force in their fight against the Luftwaffe.

- + Cheap game
- + Decent story
- + Simple gameplay

- Graphics
- Short game

Biggest complaint: the checkpoints aren't closer together. Soundtrack was tight. But I cannot progress past this one point. (And, frankly, I've grown a little weary of the repetitiveness granted by my lack of progression.). Unlike problems with run it on modern windows OS, it runs just fine on Ubuntu (under wine, of course).. Simple but elegant game design, extremely tight controls, over the top level design. Should enter directly into anyone's top 10 or even top 5 platformer. Really nothing more to say about it..

If you're REALLY not interested by time attack or speed runs you might find it a bit short but you would miss an entire new way to rediscover the game once you've done it "normally".. I would rather play candy crush. -50V10

What the hell. I don't understand why anyone is recommending this trash at all. It's boring as hell and repetitive. After every task, there's just ten more menial things to do. The story is trash and so easily seen through. The main plot is trash, and the characters personalities have no thought put into it. The whole gaming is such a chore and a waste of time. I recommend you don't suffer through this.. whats the points of this stupid game, i dont see any excitement to it

thumbs down, Not Recommended
